Profile

Lifelong learner, never afraid and always eager to learn about the new and repurposing the old. I seek to be able to help people find solutions to their problems in any way I can.

JavaScript enthusiast, love to spend time building and styling apps and components in React, have a thing for tailwindcss in particular but also love CSS in general.

Love to work in teams/collectively. I believe everything I do is about the process, learning and creating through every step and not only the end result. Also very passionate about knowledge, learning and teaching.

Education

07/2021	Alura
06/2021	TryHackMe
06/2022	Rocketseat

Front-end

I am experienced on creating both web and mobile applications, as well as writing reusable code, with React, TypeScript, React Native, Nextjs.

I am familiar and have previous experience on creating design systems and it's components and tokens with Figma and Storybook.

Passionate about creating beautiful and functional user interfaces.

Security

Practical ethical hacker. I have a fair experience with penetration testing, security frameworks such as OWASP and NIST. Know how to use tools such as BurpSuite, nmap, gobuster and more. Can implement frameworks such as OWASP's ASVS in applications.
