About me

Result-oriented software engineer, dedicated to delivery high-quality and secure solutions that meet the end-users needs.

Adept to agile methodologies. Communicative, independent and adaptable, I can integrate teams and collaborate to reach the best results, while also capable of coordinating and developing projects and tasks on my own when needed. Open-minded, always looking for new challenges and opportunities.

Projects

2022 **Ignite Shop**

An e-commerce platform created with Next.js and TypeScript, utilizing Stripe for checkout and sales.

2022 **Github Blog**

Blog created with ReactJS and stylized with TailwindCSS. Utilizing Github's API, it converts a specific repository's Issues into blog posts.

2021 **Coffee Delivery**

Coffee Delivery platform front-end created with ReactJS, TypeScript and styled-components.
